

Realistic Resume Examples for Game Development Jobs

These are realistic-style resume examples for Computer Science students and junior developers applying for game development internships and jobs.

Resume Example 1 — Unity Game Developer (Student / Fresh Graduate)

Eman Fatima

Lahore, Pakistan
+92-3XX-XXXXXXX
emanfatima.dev@gmail.com
GitHub: github.com/emanfatima
LinkedIn: linkedin.com/in/emanfatima
Portfolio: emanfatima-games.netlify.app

Objective

Computer Science student passionate about game development, gameplay programming, and interactive systems. Experienced in Unity, C#, and game mechanics implementation through academic and personal projects. Seeking a Junior Unity Developer or Game Programming Internship role.

Education

Bachelor of Science in Computer Science

Information Technology University (ITU), Lahore
Expected Graduation: 2028
CGPA: 3.52/4.00

Relevant Coursework:

- Data Structures & Algorithms
 - Object-Oriented Programming
 - Computer Graphics
 - Database Systems
 - Software Engineering
 - Assembly Language
-

Technical Skills

Languages

- C#
- C++
- Python
- JavaScript
- SQL

Game Development

- Unity Engine
- Unity Physics System
- Animation System
- Tilemaps
- UI Toolkit
- Cinemachine

Tools

- Git & GitHub
 - Visual Studio
 - Blender (Basic)
 - Photoshop
 - Figma
-

Projects

Multiplayer Survival Game | Unity + Photon

- Developed a multiplayer survival game supporting 4 players.
- Implemented player movement, inventory system, health system, and combat mechanics.
- Added synchronized networking using Photon PUN.
- Optimized game performance and reduced lag during multiplayer sessions.

2D Platformer Adventure Game | Unity

- Designed levels with enemy AI and collectibles.
- Implemented checkpoint system and smooth character controller.
- Added background music, particle effects, and animated UI.

AI Resume Matching System | Python + Streamlit

- Developed an AI-based resume matching tool using NLP techniques.
 - Built Streamlit frontend for resume uploads and similarity scoring.
 - Integrated PDF parsing and skill extraction features.
-

Experience

Game Development Intern

PixelForge Studios — Remote
June 2025 – August 2025

- Assisted in gameplay scripting and UI implementation.
 - Fixed gameplay bugs and improved performance.
 - Collaborated with artists and designers during sprint cycles.
 - Participated in code reviews using GitHub.
-

Achievements

- Participated in Global Game Jam 2025.
 - Top 10 Finalist in University Game Development Competition.
 - Solved 250+ coding problems on LeetCode.
-

Certifications

- Unity Junior Programmer Pathway
 - CS50 Introduction to Game Development
-

Resume Example 2 — Unreal Engine C++ Developer

Ahmed Raza

Islamabad, Pakistan
+92-3XX-XXXXXXX
ahmedraza.dev@gmail.com
GitHub: github.com/ahmedraza-dev
Portfolio: ahmedraza-games.vercel.app

Summary

Aspiring Unreal Engine developer with strong C++ fundamentals and experience building FPS and 3D simulation projects. Interested in gameplay systems, rendering optimization, and AI behavior programming.

Education

BS Computer Science

FAST National University
2024 – 2028

Skills

Programming

- C++
- Blueprint Scripting
- Python
- OpenGL

Engines & Frameworks

- Unreal Engine 5
- SDL2
- DirectX Basics

Development Tools

- Perforce
 - Git
 - Visual Studio
 - Rider
-

Projects

First Person Shooter Prototype | Unreal Engine 5

- Created FPS mechanics including shooting, reloading, recoil, and enemy AI.
- Developed weapon system using C++ and Blueprints.
- Added dynamic sound effects and visual feedback.

Racing Simulation Project

- Implemented realistic vehicle physics and camera systems.
- Designed UI dashboard and lap timing system.
- Improved frame rate optimization for low-end hardware.

Procedural Dungeon Generator

- Built random dungeon generation system using graph algorithms.
 - Implemented enemy spawning and loot placement systems.
-

Experience

Junior Gameplay Programmer (Freelance)

2025 – Present

- Developed gameplay systems for indie developers.
 - Fixed Unreal Engine gameplay bugs.
 - Created modular Blueprint systems for reusable mechanics.
-

Achievements

- Unreal Engine Student Showcase Participant.
 - Ranked among top students in university programming competition.
-

Resume Example 3 — Technical Game Designer / Indie Developer

Sarah Khan

Karachi, Pakistan
+92-3XX-XXXXXXX
sarahkhan.games@gmail.com
Portfolio: sarahkhanitch.io
LinkedIn: linkedin.com/in/sarahkhan-dev

Profile

Creative game developer with strong interest in level design, gameplay balancing, and indie game production. Experienced in Unity and Godot with published student projects.

Education

BS Software Engineering

COMSATS University Islamabad
Expected Graduation: 2027

Technical Skills

- Unity

- Godot Engine
 - C#
 - GDScript
 - Blender
 - Adobe Photoshop
 - Git
-

Featured Projects

Horror Escape Game

- Designed puzzle-based horror gameplay.
- Implemented AI enemy chase system.
- Created atmospheric lighting and sound triggers.

Mobile Endless Runner

- Published Android game with ads integration.
- Added in-game currency and upgrade systems.
- Achieved 2,000+ downloads on itch.io.

Turn-Based Strategy Prototype

- Developed combat system and enemy decision-making.
 - Balanced gameplay using playtesting feedback.
-

Experience

Indie Game Developer

2024 – Present

- Published multiple small indie games.
 - Worked with artists and sound designers remotely.
 - Managed version control and bug tracking.
-

Extracurricular Activities

- Participated in university hackathons.
 - Member of Game Development Society.
 - Organized campus gaming events.
-

Important Tips for Your Own Resume

Keep Resume to 1 Page

Most student and junior game development resumes should be one page only.

Add GitHub and Portfolio

Recruiters in game development care a lot about:

- GitHub projects
- Gameplay videos
- Playable demos
- itch.io links
- Portfolio websites

Mention Technologies Clearly

Examples:

- Unity
- Unreal Engine
- C#
- C++
- Blender
- Git
- Multiplayer Networking
- AI Systems

Add Game Projects

Even small games matter if they show:

- Gameplay programming
- Physics
- AI
- UI systems
- Optimization
- Multiplayer

Use Action Verbs

Examples:

- Developed
- Implemented
- Designed
- Optimized
- Built

- Integrated
- Collaborated

Avoid These Mistakes

- Long paragraphs
 - Irrelevant personal details
 - Weak project descriptions
 - No GitHub links
 - Too many colors/design elements
 - Spelling mistakes
-
